Nebraska Range Short Course
June 20-23, 2022
Chadron State College Campus
Chadron, NE

WE ARE RANGELANDS

The Nebraska Range Short Course is designed to provide people who have backgrounds in range management, natural resources, or agriculture an opportunity to increase their knowledge and capacity in the field of range management. Consisting of a series of classroom and field sessions, the course focuses on principles of range management for efficient, sustainable use of rangeland for multiple purposes.

Diverse Topics: Plant identification, plant growth and development, rangeland soils, range inventory and monitoring methods, prescribed burning, rangeland restoration, ecosystem services, wildlife management, grazing management, and range livestock production.

Credit available through the University of Nebraska-Lincoln or Chadron State College. Sixteen (16) Continuing Education credits are available for the Society for Range Management "Certified Professional in Rangeland Management" program.

Application Deadline: May 15. Enrollment is limited to the first 25 registrants.

Registration Fee: The \$325 fee includes educational materials, transportation associated with field trips, and breaks. Food and lodging can be arranged with Chadron State College.

Questions: Contact Jerry Volesky at jerry.volesky@unl.edu or (308) 696-6710.
