18TH ANNUAL NEBRASKA GRAZING CONFERENCE
August 6 – 8, 2018

Beginning and experienced graziers, land managers, policy makers, as well as those concerned with the utilization and conservation of our grazing lands will find this conference of interest. Join us to learn the most current information on grazing livestock systems and their impact on lands.

Topics include the generational transfer of farms, mixed-species grazing, grazinglands and wildlife, grazinglands monitoring, and planting decisions for alternative forages. In addition, a field tour is new to this year’s conference.

To learn more or register for the conference, visit https://grassland.unl.edu/2018-ngc. For assistance with online registration, call (402) 472-8747 beginning June 1.
