Each year during second semester, the Range Management Club attends the International Meeting of the Society for Range Management. The aim of attending is to give students an experience at networking with professionals, an opportunity to attend seminars and stay current on rangeland issues and research, and the chance to improve their knowledge of rangeland ecology and management by participating in various competitions. The 2020 annual meeting was February 16-20 in Denver, Colorado where the club competed in the Plant Identification Contest, Undergraduate Range Management Exam (URME), Rangeland Cup, and Extemporaneous Speaking Contest. Club members attending the meeting were Asha Scheideler, Nick Sanders, Kaitlyn Dozler, Nicole Strand, Patrick, and Grant. Nebraska placed third out of 13 teams in the Rangeland Cup (poster competition), Dozler placed fifth out of 30+ individuals in the Extemporaneous Speaking Contest, and Strand placed sixth out of 200+ individuals in URME. The Club also toured the Rocking Mountain National Park area where they learned about the different landscapes and array of plants that grow in the area. Club co-advisors are Cheryl Dunn of the Agronomy and Horticulture Department and Jessica Windh of the Agricultural Economics Department.
